FYI, we did receive the the NDA from Gustavo. I will send to our business office for review so we can be ready when needed, but will not do anything with it until we have had our call with CDC.

Dear Simon and Tracey,

This is the third time in three months that I have been contacted concerning this request. On each occasion I have explained that I don't direct this project, and connected you with Dr. Palacios. Please appreciate that this is impacting how you and PREDICT are viewed by people whose support you and the program will need to be successful.

This should be a win for all concerned. PREDICT, NIH and the DoD are committed to promoting public health. The expertise of the groups is complementary. USAMRIID has offered a non-disclosure agreement. You need not indicate the county of origin of the sequence.

The deputy directors of major federal institutions are aware of your conversations and are hoping to use the sequences as an example of how they (and PREDICT) can work together and move rapidly from viral discovery to solutions. They are now planning to abandon your finding and focus elsewhere--others have filoviruses, hantaviruses, henipahviruses that could serve as models.

I strongly urge you to either move forward or explain to Dr. Palacios what has changed since you agreed to provide the sequences to him.

I am copying Jonna this time because a derailed collaboration would have implications for both PREDICT and the GVP.

Please call me on [REDACTED] if you want input on strategy before reaching out to Dr. Palacios. I'm only just back from Gorakhpur but will leave my phone on until 9pm EST.

All best wishes,

Ian

Classification: UNCLASSIFIED

Caveats: NONE

Dear Tracey & Simon,

I wonder if you have any update for us regarding the NDA. Is there anything else that we can do?

I have a reasonable expectation that we will get support to move this fast through the NICBR given the support of Cliff Lane (NIAID) & Sina Bavari (USAMRIID).

But we need to move fast and I am afraid that we are not showing any urge.

If we want to make the case that this is an urgent public health related need, we need to act.

Have the issues regarding the publication of the manuscript been cleared?

Warm regards,

-Gus

Dear Gustavo,

Thank you for sending. I have been traveling internationally and will submit to our legal office for review in the next couple of weeks. Will be in touch as soon as I can.

Best, Tracey

Tracey, Anthony,

Please let me know if you need me to follow up on this.

We are really eager to start.

We should follow up preparing a CRADA too but that probably will take more time.

Best,

Gus

Dr. Goldstein

Please find attached a draft Nondisclosure Agreement with USAMRIID. Please review the agreement or forward to your Technology Transfer or Legal Office if necessary. If the NDA is acceptable to your organization, please initiate obtaining a signature and email me a pdf copy of the partially executed document for USAMRIID countersignatures. Once countersigned, I will email you a fully executed pdf copy of the agreement. If your organization requires changes, please red-line any changes and email it back to me for USAMRIID's review.

Please feel free to contact me should you have any questions.

Thank you

Amanda
